

WHY REMORY

Beautiful memories should not fade.

Do you know that feeling? You talk about your last trip and suddenly the details are gone - the places, the little moments, the name of that perfect pistachio cake.

Remory captures what matters in seconds and turns scattered photos, notes, places and dates into memories you can relive anytime.

Team Remory

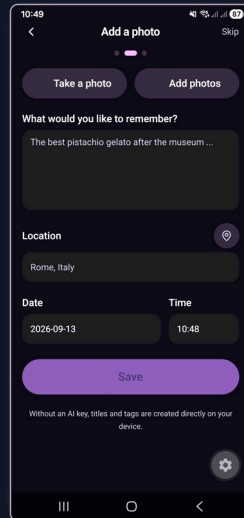

Open. Capture what matters now. Relive it later.

open, capture what matters now, relive it later

NEXT STEPS

What we will integrate next

Focused tasks to move from prototype to a polished app experience.

01 Text transformation

Turn notes and keywords into personal memory texts.

02 Additional information

Enrich moments with researched context about places and experiences.

03 Search function

Find memories by natural language, date, tags, location or favorites.

04 Design refinement

Polish navigation, spacing, visual clarity and the overall premium feel.
